THE ALL-IN-ONE POS FOR PHILIPPINE BUSINESSES

One system runs your whole business.

TarsierPOS sells at the counter, prints BIR-compliant receipts, tracks stock down to the last gram, and tells you your **real profit** — on one quiet box, with **no monthly fees and no per-transaction charges.** Set it up once; it runs the counter, the kitchen, and the owner's reports for you.

BIR-compliant receipting | Ingredient-level costing | Works fully offline | One-time purchase | Remote owner view

The cashier screen — touch menu with real product photos, live cart with variants & add-ons, and every payment option one tap away.

₱0
monthly subscription — you own it outright

₱0
per-transaction / per-swipe fees, ever

100%
of sales keep working when the internet drops

1
system for selling, stock, tax & reports

Installed & set up for you

We configure your menu, prices, printer, and BIR details on the box before it reaches your counter.

Remotely maintained

Updates, backups, and support are handled by Tarsier — nothing for you to manage.

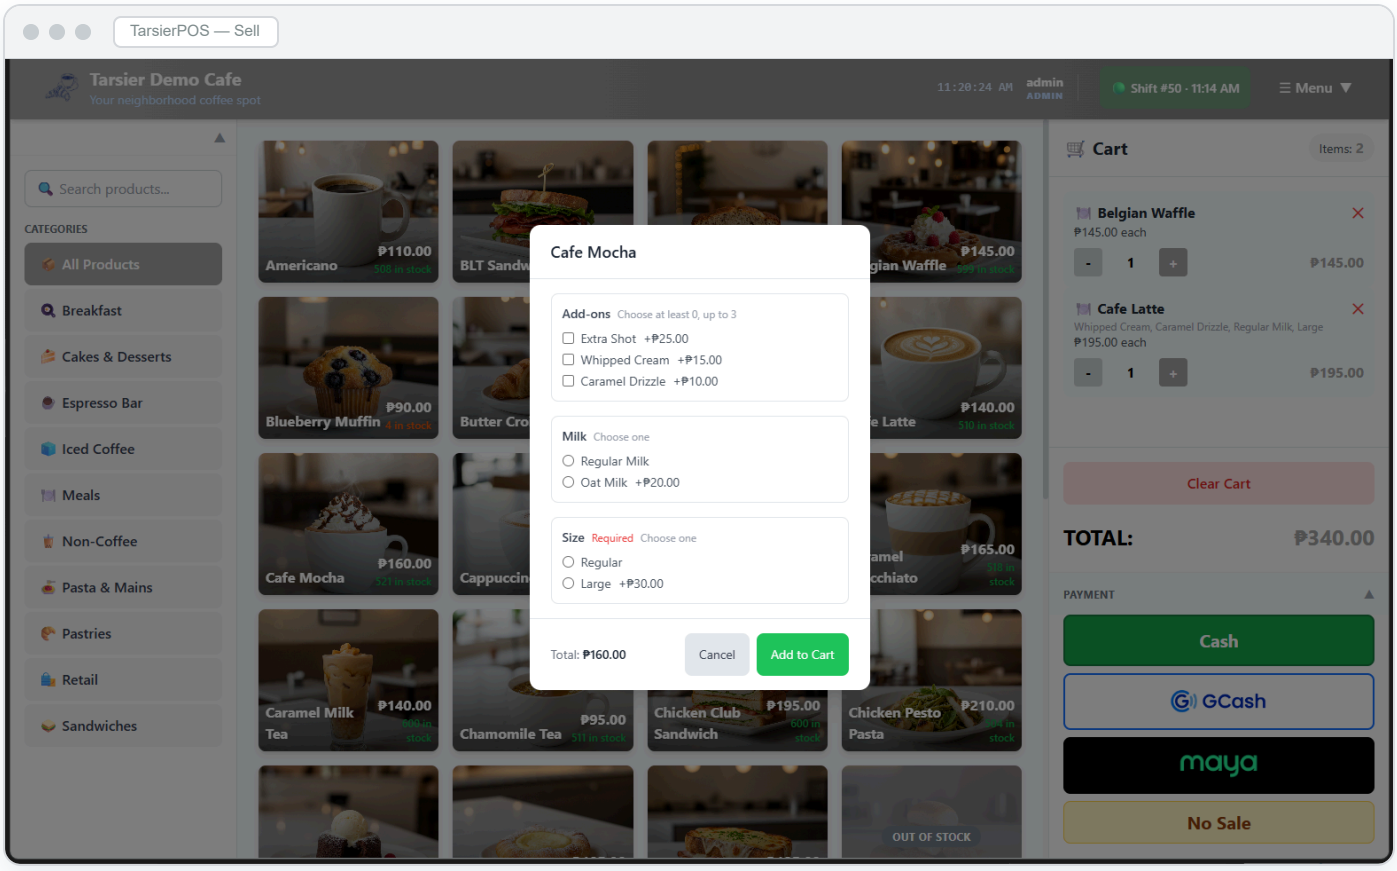

Live in Philippine cafés today

Running real counters right now, ringing real sales, printing real BIR-compliant receipts.

AT THE COUNTER

Sell anything in a tap — with the details right

A coffee with three add-ons and a size upgrade, a rice meal, or a bottle scanned at the register — TarsierPOS rings it up in seconds and keeps every modifier, price, and stock deduction correct.

Variants, add-ons & modifiers — size, milk, and multi-select add-ons with min/max rules; each option prices itself and deducts the right ingredients.

Fast touch selling

Category grid, product photos, barcode scanning, and one-tap quick-tender for exact cash.

Discounts done right

Senior Citizen & PWD discounts apply the correct VAT exemption automatically — per RA 9994 / RA 10754.

Refunds & voids

Reverse a sale in one action — stock is restored automatically and every reversal is logged.

Shifts & drawer

Per-cashier shifts with an opening float and automatic over / short reconciliation at close.

Roles & quick-login

Admin / manager / cashier roles, avatar quick-login, and per-user control of every screen.

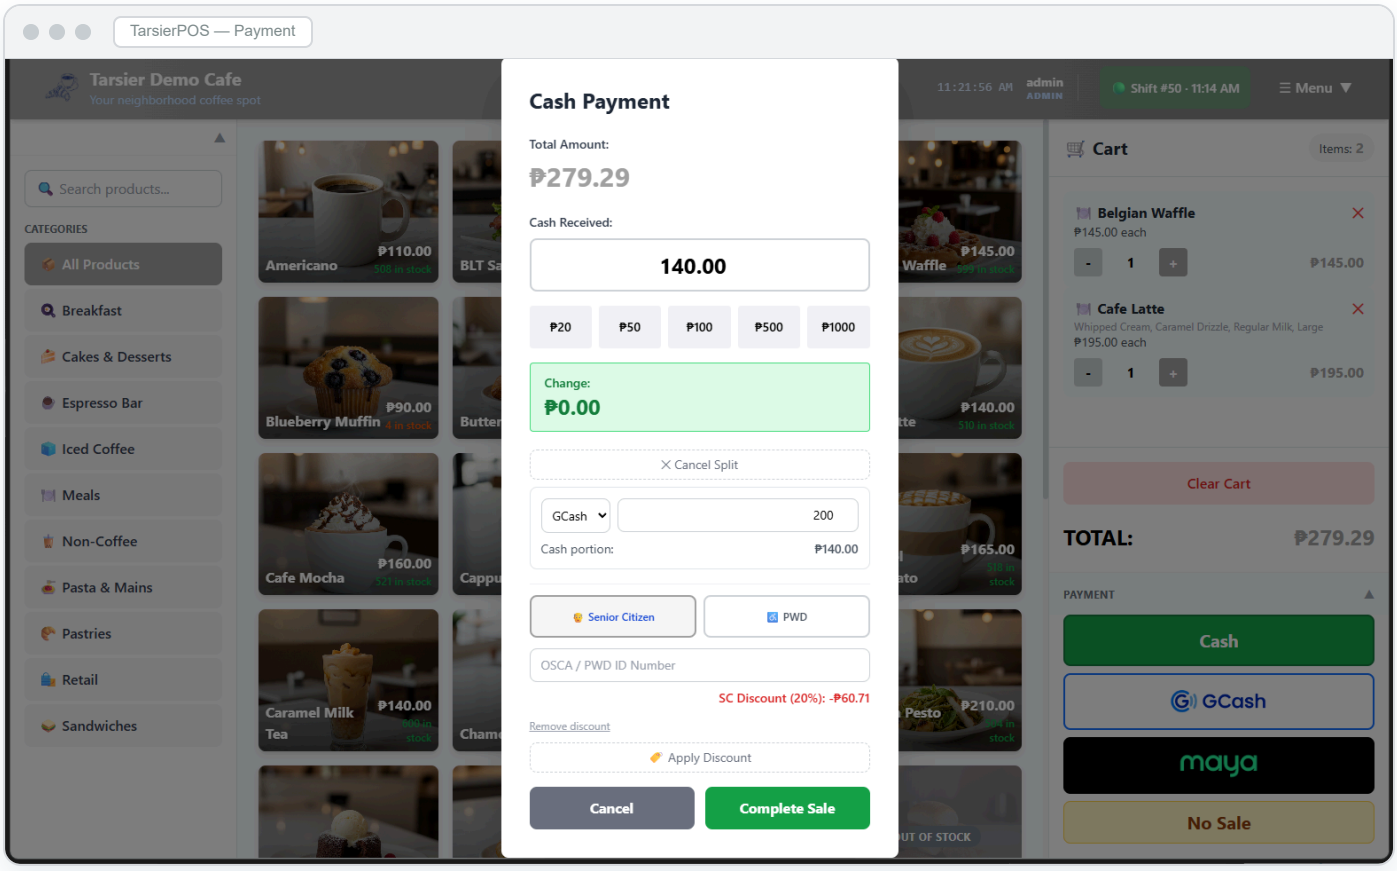

Live stock on the tile

Each product shows stock at a glance; out-of-stock items are blocked from being oversold.

CHECKOUT

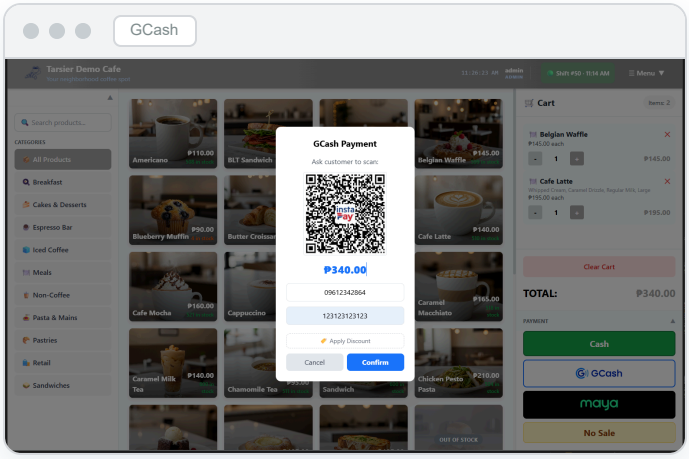

Take every kind of payment your customers use

Cash, GCash, Maya, and card — and when one bill is settled two ways, TarsierPOS splits it cleanly and keeps the discount and VAT math correct on both parts.

Split payment + discount — part cash, part GCash on a single sale, with a Senior/PWD discount applied and the change computed for you.

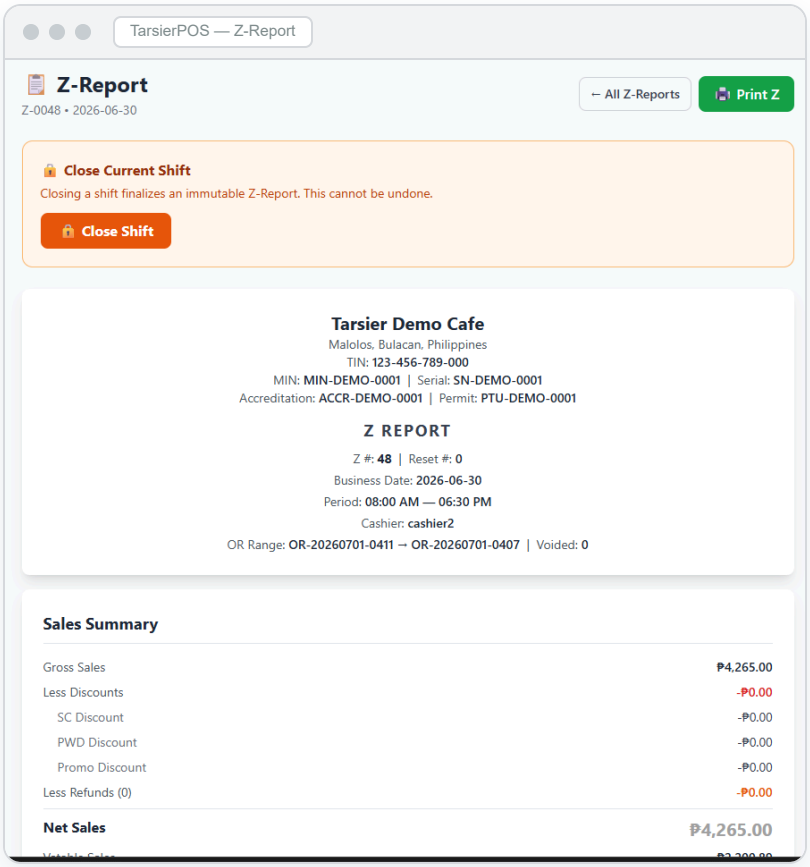

- **Four ways to pay** — cash, GCash, Maya, and card, each with its own reference capture.
- **Split / multi-payment** — one bill, two methods, reconciled automatically.
- **Digital made simple** — show the store QR, confirm, done.
- **Discounts & VAT exemption** applied before tender, never as an afterthought.

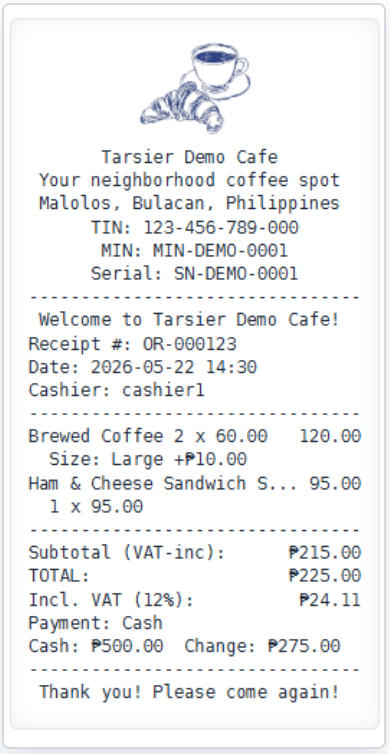

COMPLIANCE, HANDLED

BIR-compliant receipting — correct by default, not by discipline

Receipt numbering, VAT breakdowns, discount exemptions, and end-of-day totals are built in and automatic. You sell; the compliance takes care of itself.

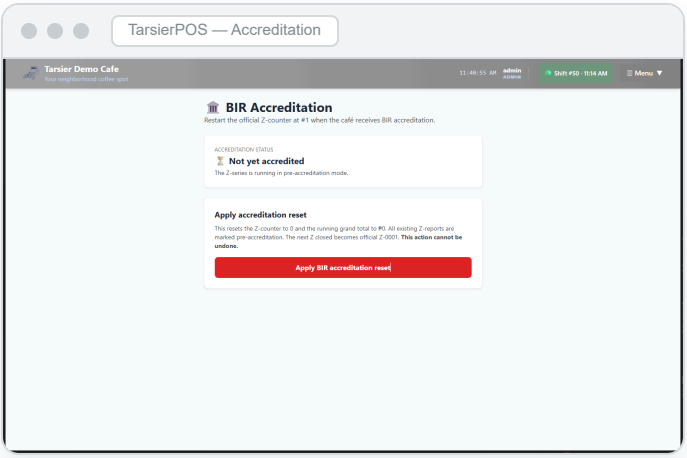

The end-of-day Z-Report — business name, TIN, MIN, serial & accreditation, sequential OR range, and full VAT / discount / refund breakdown — immutable once finalized.

The customer's receipt
business identity, itemized sale & VAT (12%)

What's built into every sale & report

- **Sequential Official Receipt numbers** from an immutable counter
- **SC / PWD discounts** with automatic VAT exemption
- **VAT, VAT-exempt & zero-rated** split on every receipt & Z-report
- **Business name, TIN, MIN & serial** on receipts and reports
- **58mm & 80mm thermal** printing with cash-drawer kick

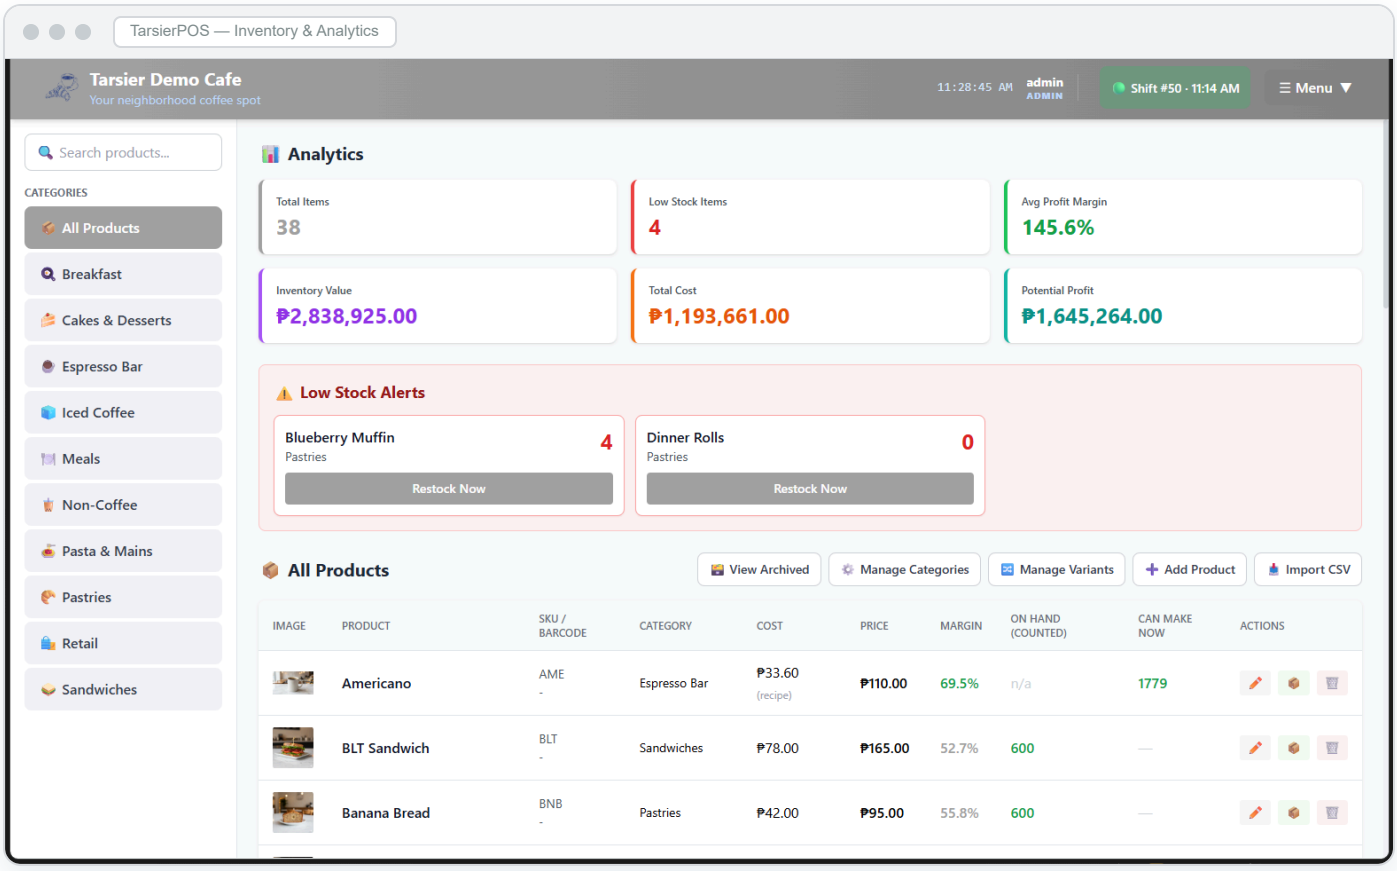

Works before and after accreditation — runs unofficial, then flips to official when your MIN is issued.

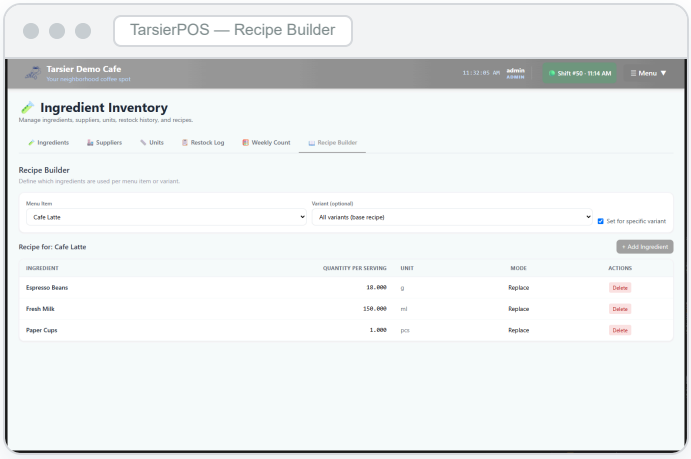

THE PART OTHER POS SYSTEMS CAN'T DO

You already know your sales. Now know your profit.

TarsierPOS derives the true cost and margin of every item from its recipe — so profitability is a number on the screen, not a guess at the end of the month.

Live cost & true margin on every product — inventory value, food cost, projected profit, and low-stock alerts, computed automatically from recipes.

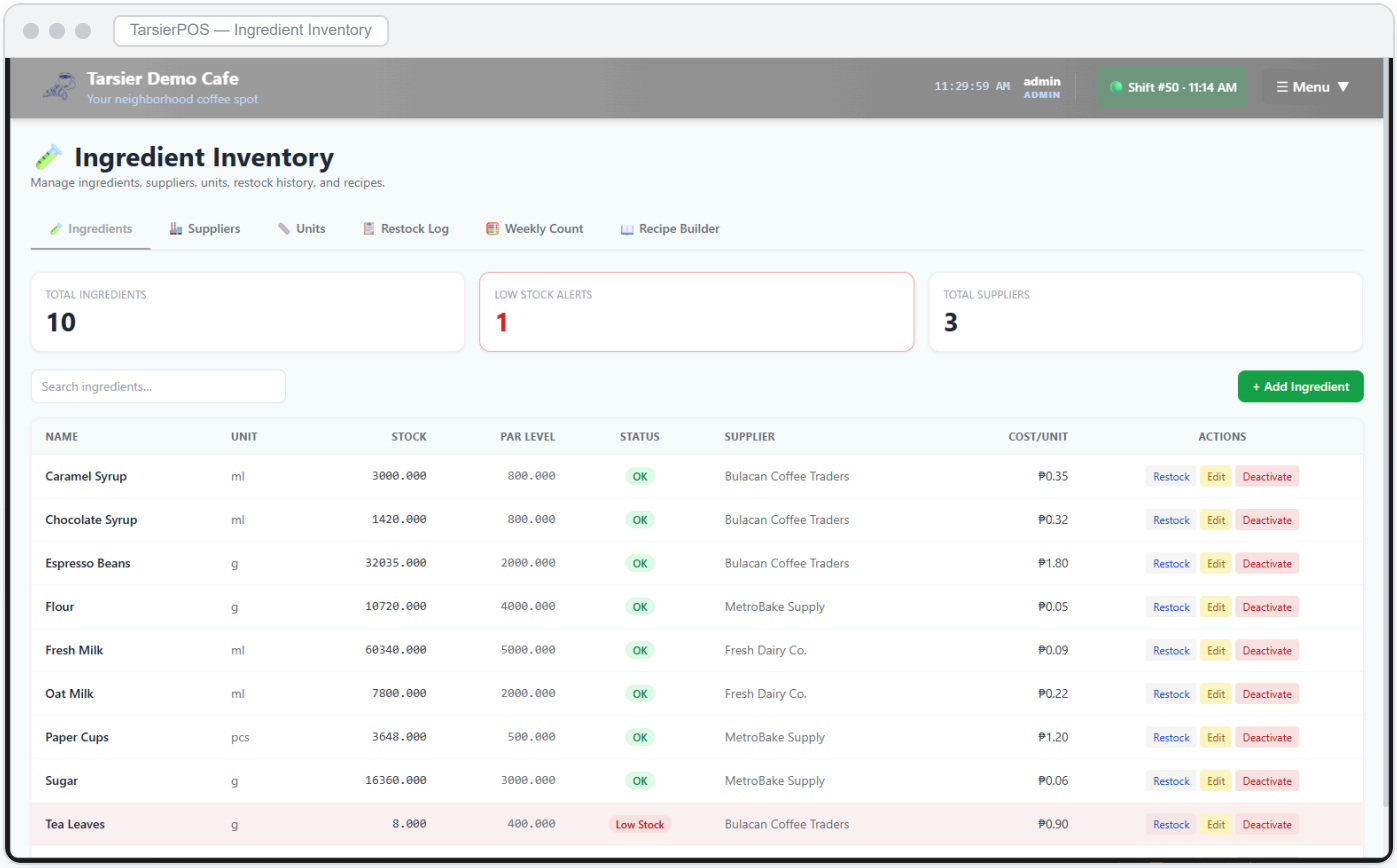

- **Recipe-based costing** — each drink's cost comes from its ingredients at weighted moving-average prices.
- **Stays accurate** as supplier prices change — no manual re-pricing.
- **"Can make now"** shows how many you can still make from stock on hand.
- **Per-variant recipes** — a Large adds milk & a shot; Oat Milk swaps the base.

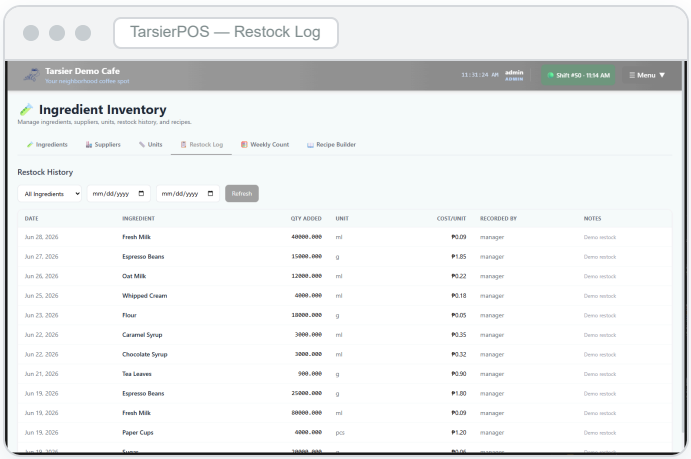

INVENTORY THAT MANAGES ITSELF

Track every gram — the POS does the counting

Ingredients deplete as you sell. Purchases roll into cost automatically. The owner records only what's *bought* and, once a week, what's *left*.

Ingredient stock, par levels & supplier cost — with low-stock flags and one-tap restock; the ledger tracks every movement.

The owner's whole job — three simple actions

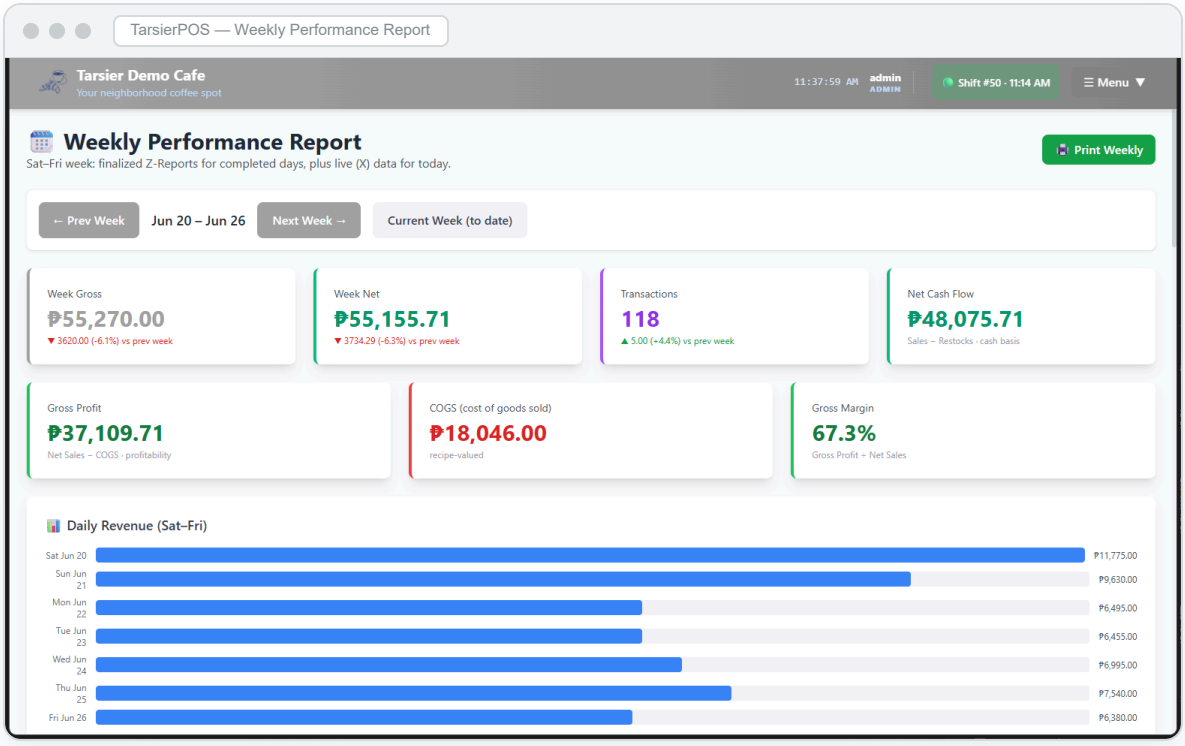

- **Record purchases** by the package when stock arrives ("2 boxes @ ₱450").
- **Keep recipes right** once, when a drink is created or changed.
- **Count weekly** — only the items the POS flags. Variance logs as waste automatically.

Staff just ring sales. The POS handles depletion, costing, and COGS on its own.

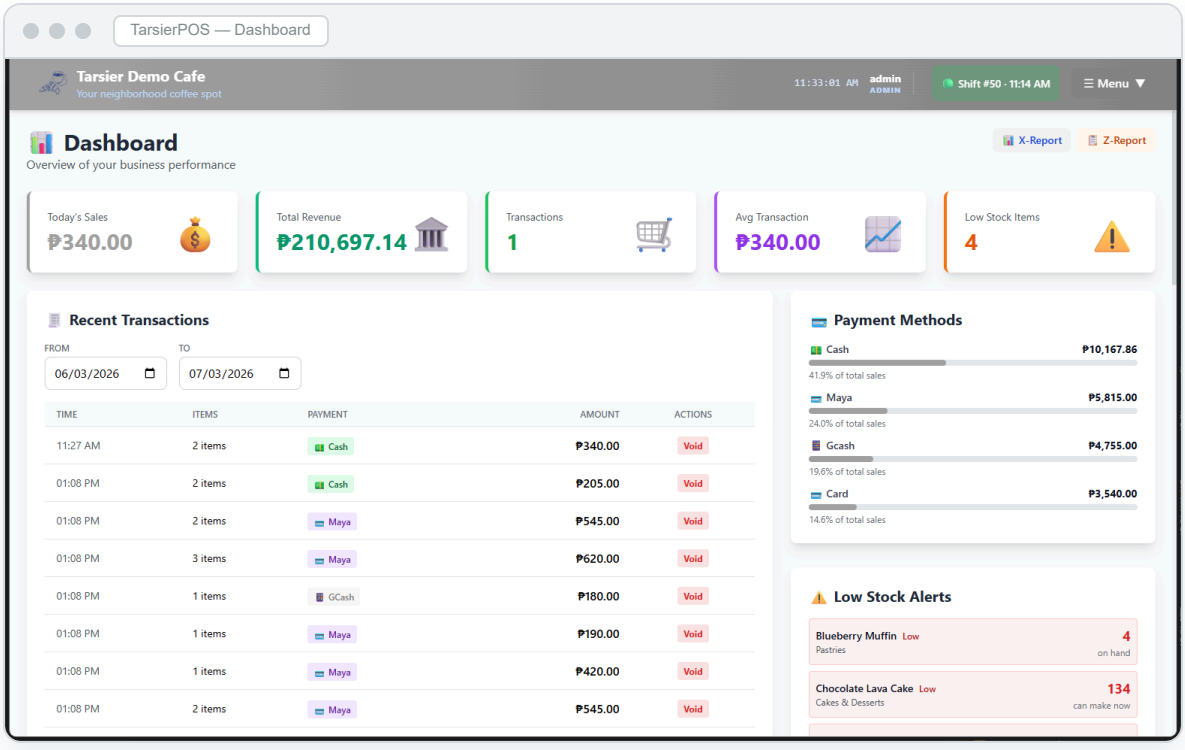

SEE THE WHOLE BUSINESS

The numbers that actually matter — every day and every week

TarsierPOS turns raw sales into profit, trends, and the few actions that move the needle.

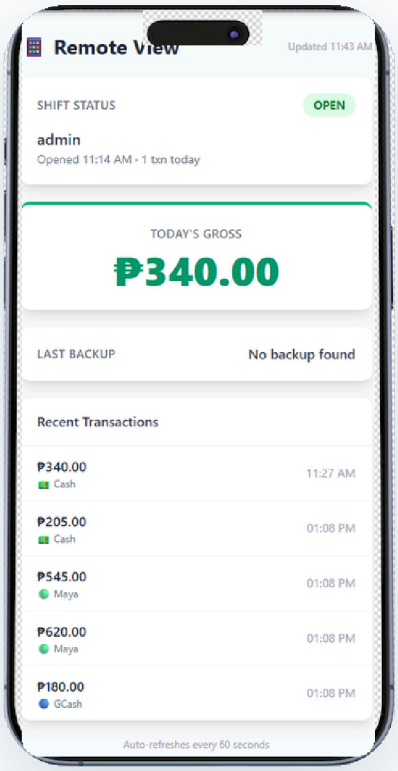

Weekly performance — gross & net, COGS, gross margin, and net cash flow with week-over-week deltas, plus a daily revenue chart. Prints on the same thermal printer.

Owner dashboard — today's sales, payment mix, recent transactions, and low-stock alerts at a glance. Plus X-reads, peak-hour and per-cashier insights, and any date range.

FROM ANYWHERE · NEVER DOWN

Check the shop from your pocket — and trust it to stay running

Owners don't have to be behind the counter. The **remote view** puts who's on shift, today's gross, and the latest transactions on your phone — auto-refreshing, from home or on the road.

- **Live shift & today's gross** — the moment you open it.
- **Recent transactions** streaming in with payment type.
- **Installable** — add it to your home screen like a native app.
- **Nothing to configure** — it just mirrors your live counter.

Built so it never lets you down

Works offline

An installable app that keeps selling through internet drops and syncs when back. Your busiest hour never depends on WiFi.

Automatic backups

Scheduled local **and** off-site cloud backups, plus a safety copy before every update. Your data is never one accident from gone.

Self-healing kiosk

Boots straight into the POS, hides the desktop, and a watchdog reconnects the network on its own.

Affordable, all-in hardware — no proprietary terminal

TarsierPOS runs on a compact mini-PC with a touch screen, thermal printer, cash drawer and barcode scanner — a fraction of the cost of a branded terminal, with **no per-transaction fees and no lock-in.** One quiet box on your counter, installed and remotely maintained by Tarsier. You buy it once and you own it — hardware, software, and your data.

What sits on your counter

Mini-PC

Compact, silent and low-power — the brain of the whole system.

Touch screen

Fast tapping for a busy counter; mounts on any stand or wall.

Thermal printer

58mm or 80mm receipts with an automatic cash-drawer kick.

Barcode scanner

Ring packaged goods in a single beep, straight into the cart.

Cash drawer

Auto-opens on every cash sale; keeps the till accurate.

READY FOR ANY INDUSTRY

One system, every business, yours included.

Or Any Other Retail or Service Business

BEYOND POS: CUSTOM SOFTWARE, BUILT AROUND YOU

Don't see your business on the list? We also build custom software, tailored specifically to how you operate.

Whether you run a real estate agency, a logistics company, a professional service firm, or something entirely unique, we design and build the system your business actually needs:

Business Websites
Professional, built to convert visitors into customers

Mobile Apps
For your customers, your staff, or both

CRM Systems
Track clients, leads, and follow-ups in one place

Booking & Reservation Platforms
Appointments, schedules, and availability, automated

Inventory & Operations Management
Beyond retail, built for how you actually work

Client & Customer Portals
Self-service access to their orders, records, or accounts

Automated Reports & Dashboards
Real business data, not spreadsheets

Fully Custom Business Tools
Anything unique to your workflow, built from scratch
